

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

DISTRICT OF MASSACHUSETTS, to wit:

District Clerk's Office.

BE IT REMEMBERED, That on the twentieth day of June, A. D. 1898, in the fifty-second year of the Independence of the United States of America, Hilliard, Gray, Little, and Wilkins, of the said district, have deposited in this office the title of a book, the right whereof they claim as proprietors, in the words following, to wit:—

"A Greek and English Dictionary, comprising all the Words in the Writings of the most popular Greek Authors; with the Difficult Inflections in them and in the Septuagint and New Testament: designed for the Use of Schools and the Undergraduate Course of a Collegiate Education. By the Rev. John Groves. With Corrections and Additional Matter, by the American Editor.

Clerk of the District of Massachusetts.

PREFACE.

THE object of the compiler of this work was to offer to the public a **DICTIONARY**, which young Greek scholars could use with ease and advantage to themselves; but sufficiently full to be equally serviceable as they advanced; a Book that would answer for School, for College, and more particularly, for reading the New Testament and the Septuagint. It was not without a conviction of its necessity, founded on experience, that this work was undertaken. How far it will answer the proposed end will be best known to those who make a trial of its merits. To explain how that has been attempted is the purpose of these pages.

To give English significations for Greek words is the original principle on which this Dictionary was compiled. The surprising ease with which very young boys understood the Gospels, with the assistance of Parkhurst's Dictionary,—suggested the commencement of this work. They translated the Gospels with much more facility, than the Latin elementary books they were reading at the same time; although this Dictionary, then the only one which gave English explanations for the Greek words, afforded by no means sufficient assistance for beginners. The superior ease with which Greek could be thus learned, even under this disadvantage, suggested the thought of removing this difficulty by the publication of a Dictionary, which to English significations,—would add the several assistances that this now offers.

In the arrangement of the words, the alphabetical method has been adopted as best suited to the capacity and diligence of the young learner. In this respect, and in some others, this Dictionary resembles the Greek and Latin Lexicon of Schrevelius, for a long time used in schools. The outline of the plan of each is very similar; but this differs from Schrevelius in many particulars, some of which it is hoped will appear to be improvements.

Immediately after each word is placed its form of declension or conjugation, together with any peculiarity attending it; such as the Attic genitive of contracted nouns, the future or perfect of any dialect peculiar to certain verbs, &c.

Next is placed the derivation or composition of the word. Particular attention has been paid to this part of the work. In most Lexicons the bare theme is usually set at the end of the word, without any attempt to show how it forms a part of the word to which it is thus attached; and

often without any signification in Latin or English. The incapacity or indolence of the great majority of school-boys, is thus left without any thing to excite the one or assist the other; while industry and attention are damped and discouraged. Here, the composition or derivation, generally followed by the original theme, is set before the English signification, so as to catch the eye. The English of these words is always given, so that the connexion between them and the present word may be perceived, and a judgment formed how the one is deduced from the other. Where a word is compounded with an adverb, preposition, or other particle, an attempt has always been made to give the meaning of that part, or to show the effect it has in altering the signification of the word to which it is prefixed. This has often been difficult, and sometimes has remained unsatisfactory; because the word often takes several significations, from the different shades of expression given by the various powers of the particle. In a few obvious instances this effect has been noticed; but generally all farther explanations have been avoided, experience having convinced the compiler that young learners do not attend to them: and scholars will require much more than can be given in a work that beginners can use with ease and advantage.

The English significations of the Greek word follow next. These have been selected from a careful comparison of the Latin of Stephens' *Thesaurus*, *Scapula*, *Damm*, *Schleusner*, and in many instances, other *Lexicons* have been consulted with advantage. Some few very unusual significations, occurring only in authors likely to be read by very advanced scholars, have been omitted. In this part two or three synonyms have been given for each signification; and the most usual or vernacular expressions have been introduced, that thus the Greek sentence may fall into familiar English. Several also of the *Indexes* or *Vocabularies* annexed to new editions of school books, have been looked into; so that, it is hoped, that the significations thus selected, will be found correct; and that the latter, having been chosen for these particular authors, will catch the attention of the young scholar, while engaged in translating their writings, as being well adapted to his immediate reading.

After the significations are subjoined, any irregularities or varieties arising from dialect, &c. and some of the more difficult inflections of each word are added.

Such is a sketch of the mode of arrangement pursued. It may be proper to mention, by what additions this *DICTIONARY* hopes to claim the student's attention.

A considerable number of new words have been introduced. These consist of words occurring in the authors usually read, and in the *Septuagint*, which are not to be found in *Schrevelius*. They are also taken from the Greek tragedies now generally read at schools, from elementary books latterly introduced, and from Mr. Walker's new selection of *Lucian's Dialogues*. So that this *DICTIONARY* will be found to answer for the study

PREFACE.

v

of those introductory works alluded to; for the New Testament, and the Greek translation of the Old; for Homer; for most of Lucian's Dialogues and his *Συγγαμίειν* for the works of Xenophon; for some of the orators and Greek tragedians; comprising a copious school course, and a large portion of the Greek authors read in our Universities. A book of this kind, applicable to so many authors, must be generally useful, though it cannot aspire to the name of a universal Greek Dictionary. An attempt to do so would extend it far beyond the limits of a companion for the school boy, or the College student; especially when the following addition is taken into consideration.

All the inflected parts of words which are in Schrevelius are to be found in this Dictionary, with many others. These consist of oblique cases of nouns, pronouns, and participles; of persons, tenses, moods, &c. of verbs, and comprise all the difficult variations occurring in Homer, and those other Greek books just mentioned. When it is considered that there are instances of oblique cases, which retain but small resemblance to their nominatives, and that in verbs, even those perfectly regular, there are parts unlike their themes, both at the beginning, and in the middle, as well as in their terminations, this must be acknowledged to be not only a useful, but even a necessary part of a Greek Dictionary. And when the numerous varieties and irregularities of words in most common use are taken into account, this part of the work will appear almost indispensable. There is no English attached to these parts and inflections, but a reference is given to the theme, where all the significations will be found. This part of the work has been particularly attended to, where it respects the New Testament; for every variation of case, gender, and number, and of mood, tense, person, &c. occurring in that book, is inserted in this Dictionary; except the forms of the simple parisyllabic declensions. These were considered too obvious to any one that had read the Greek Grammar, to require a place here; but there is a notification of this omission placed at the head of the list of abbreviations, with a rule of direction when any of these inflections occur. So considerable an addition of words without any signification, was made from a consideration, that, as the Gospels are very frequently used as an elementary book in Greek, beginners would require more of that kind of assistance than others. There was also another motive. There are many persons, who, long after they have ceased to study languages, and have embarked in the active pursuits of life, feel, at their leisure hours, an inclination to renew the studies of their youth; and a more intimate acquaintance with the Bible is a favourite object with persons of this turn. A mind of this cast, that retains any recollection of the Greek Grammar, will, with the assistance of this Dictionary, be able to recall all it has learned, with considerable additions. By the use of it, every difficulty that occurs in the New Testament, and in those books already mentioned, will be smoothed; the student being made acquainted with the nature of any inflected word, which long disuse

may have rendered him unable to analyse; while sufficient exercise remains for the understanding, in being left to select an appropriate signification from among the English given for the theme referred to. Thus, this Book will be particularly useful to those who may wish to revive their knowledge of Greek; and especially of the New Testament. Should leisure enable or inclination dispose them to extend their reading to the Greek of the Septuagint translation of the Old Testament, they will further find in this Dictionary all the words occurring in that book. None of the inflections of these words are directly inserted, except a few peculiar terminations, which seem to be provincialisms, used by the Alexandrian Greeks, who are supposed to have made parts of that translation; but many of these inflections may be found the same as in other books. These were omitted, because to insert all that may be met with were an endless task; it was unnecessary to do so, because the books of the Septuagint are not used as an elementary study; and because the previous reading of the New Testament will give sufficient practice of grammatical analysis to enable the student to trace the inflections in the Septuagint. Thus this Dictionary will answer for the study of the entire Bible, of the New Testament in its original language, and of the Old in a language into which it was translated by persons who cannot be suspected of having been biassed by any of the schisms that have divided the Church of Christ.

These additions have extended this work a little beyond the size of Schrevelius, while nothing useful or material has been omitted. There are indeed no references given or authorities cited, experience having shown the compiler that young students pay no attention to many of those assistances which more advanced scholars look for in Dictionaries; while these receive very little benefit from that scanty portion of references or quotations which can be given in a book adapted to the use of schools. Accordingly, after very mature consideration, every thing has been retrenched that did not coincide with the young scholar's capacity; and the room thus made has been filled up with what more usually catches his attention. He has here given to him what he will notice at present, instead of what he may look for at a more advanced period of his studies. He has laid before him what will be immediately useful, for what might be serviceable hereafter. Very few phrases are given, and that only when an indeclinable part of speech, joined with another word, may be construed briefly by an adverbial expression. All this plan could not be put in practice at first, for the propriety of some parts of it occurred only during the progress of the work; but it has been very strictly adhered to in the course of two rigid revisals that the work received before it went to the press.

Satisfaction respecting the execution of this work will be best had by inspecting a few pages, opened indifferently in several parts of the book. There it will be observed that the accents have been retained. The use of them, whether as a means of acquiring the ancient pronunciation, or of establishing

a fixed one, is very questionable; because the tone, emphasis, or other inflection of voice implied by any mark, can hardly be conveyed by words. Such modulations of the voice must be lost with the persons who used them. The best method perhaps of fixing the pronunciation of the ancient Greek would be to adopt that of their modern descendants. These still understand the oldest books in that language more readily than Englishmen can read Chaucer's works, or Wickliffe's translation of the Bible. Whatever marks they use might be adopted, because the intonations of the voice implied by them can be learned by oral instruction from this people. To say that the ancient accents may serve a secondary purpose, and be useful as distinctive marks of words otherwise similar, is but to make a stupid apology for the indolence that will not endeavour to discover the signification of a word from the tenor of the sentence, and the spirit of the context. However, that the absence of such assistance may not be alleged as a defect in this work, they are inserted according to the rules for their use generally followed.

The spiritus lenis, which only serves to mark the absence of the asper, has been omitted, because it expresses nothing; and creates confusion to beginners.

The Apostrophe, Dialysis, and / subscribed have been particularly attended to; and the quantity of the doubtful vowels has been marked.

The type is clear and distinct, having been cast for the work; and the paper is better than what is generally used for such books.

Under all these circumstances, the utility of this Greek and English Dictionary is anxiously anticipated, as likely to be serviceable to the young scholar and college student, in the acquisition of a language remarkable for the extent of its use in ancient times, and for the extraordinary length of time, that beyond all other languages it has existed, with some alterations, as a vernacular tongue; to the retired gentleman, who can find pleasure in recurring to those early studies which are now considered as an indispensable part of liberal education, and an ornament to the higher ranks of society; and to the thoughtful Christian, who may wish to imbibe the precepts of the Gospel from their purest source.

NOTICE CONCERNING WORDS FROM THE NEW TESTAMENT

Every inflection of case, gender, or number of nouns, pronouns, or participles occurring in the New Testament, has been inserted in this Dictionary; except the forms of the simple parasyllabic declensions. Therefore, if any such word is not to be found, its nominative case ends in *-a*, *-s*, *-en*, *-is*, *-os*, or *-us*, and must be looked for accordingly.

Also every variation of mood, tense, person, &c. of verbs in the New Testament, may be found here.

Along with these may be found many other inflections from classical authors.

These inflections are not always put directly in column; but several cases are sometimes inserted under one, as may be observed in *ἦτα*, *θίσις*, *μερίδες*.

In like manner, tenses, &c. of verbs that resemble each other, are frequently put together. Such words are always separated by a —, and each begins with a capital letter, as may be seen in *Ἐξαγγελία*, *Ἐκείνη*, *Μετάνοια*.

SUPPLEMENT.

A SKETCH OF THE PRINCIPAL USAGES OF THE MIDDLE VOICE OF THE GREEK VERB,

WHEN ITS SIGNIFICATION IS STRICTLY OBSERVED.

THE first four may be called usages of *reflexive*; the fifth, the usage of *reciprocal* signification.

I. Where A does the act on himself, or on what belongs to himself, i. e. is the object of his own action.

1. ἀπήγγαστο, *he hanged himself*.

2. ὦμωξεν δ' ὁ γέρον, κεφαλὴν δ' ὄγε κόψατο χερσίν, i. e. *beat himself on his head, κατὰ τὴν κεφαλὴν*. Iliad. X. 33.

II. Where A does the act on some other object M, relatively to himself, (in the sense of the dative case put acquisitively,) and not for another person B.

1. Ἀ κατεστρέψατο τὸν Μῆδον.

He made the Persian subject, or subdued him, to himself.

Ἀ κατέστρεψε τὸν Μῆδον τῷ B, is a very different use of the verb.

2. To this usage belongs the following—

κοινῇ ἀπωσόμενοι τὸν Βάρβαρον, Thucyd. I. 18. *having repelled or kept off from themselves*; and the like.

III. Where A gets an act done for himself, or for those belonging to him, by B.

1. Of Chryses it is said, λυόμενος θύγατρα, *to get his daughter released by Agamemnon, on the payment of a ransom*, that is, briefly, *to ransom his daughter*.

Whereas of Agamemnon it is said, Οὐδ' ἀπέλυσε θύγατρα, sc. τῷ Χρύσῃ. He did not grant the release, he did not release her.

So, too, Chryses to the Greeks, Παιδα δ' ἰμοὶ λύσαιτε φίλην.

To this head may be appended, διδάσασθαι τὸν υἱόν—*to get one's son instructed*. Euripides has said, with a double idiom, Medea v. 297. παῖδας περισσῶς ἐκδιδάσκεισθαι σοφούς.

2. δανείζω, *to give a loan, to lend*, as A to B.

δανείζομαι, *to get a loan, to borrow*, as B from A.

So, too, in the Epigram, χρήσας, *having lent*; χρησόμενος, *having borrowed*.

Ἀνὴρ τις λιπόμενον ὑπὲρ νότιοιο λιπανγῆς

ἦγε, πόδας χρήσας, ὄμματα χρησόμενος.

Again, χρῆσαι, *to utter a response*; χρῆσασθαι, *to seek a response, to consult an oracle*.

IV. Where, in such verbs as κόπτομαι, *lugeo*, στέλλομαι, *τίλλομαι*, &c. the direct action is done by A on himself, but an accusative or other case follows of B, whom that action further regards.

Στείνονται ταχίεις τε κύνας κ. τ. λ. Iliad. F. 25.

although fleet dogs stir themselves in pursuit of him.

Διωνύσοιο τιθήνας

Στεῖε Z. 133. is a different use of the verb.

Again, Πρῶται τὸν γ' ἄλοχός τε φίλη καὶ πότνια μήτηρ

Τίλλεσθην Ω. 710, 11. *tore their hair in mourning over him.*

But κείρομαι is differently used. Bion has Κειράμενοι χαίτας ἔπ' Ἀδώνιδι, not Ἀδωνιν, Epitaph. Adon. 81.

To this class belong φυλάττω and φυλάττομαι.

φυλάξαι τὸν παῖδα. φυλάξασθαι τὸν λίοντα.

and so, too, the following—

ὦς ἐπλών. οὗ παιδὸς δρέξατο παῖδιμος Ἔκτωρ.

stretched out his arms to receive his son.

Thus far the *reflexive* uses; now the *reciprocal* use.

V. Where the action is reciprocal betwixt two persons or parties, and A does to B what B does to A ; as in verbs of *contract, quarrel, war, reconciliation*, and the like ; as, ἔως ἂν διαλυσώμεθα τὸν πόλεμον, Demosth. Philip. A. § 6. *till we shall have put an end to the war, in which we are engaged with Philip, by treaty mutually agreed upon.*

In a very different sense, as follows, is διαλύσαι used—
παρήναι δὲ [Ἀλκιβιάδης] καὶ τοῖς Τισσαφρόνῃ μὴ ἔργον ἐπιτελεῖσθαι τὸν πόλεμον διαλύσαι, *to be in no hurry to put an end to the war between the two conflicting parties in Greece.* Thucyd. VIII. 46.

REMARK. Though, on some occasions, the active voice is used where the middle would be proper, that is, where the act is denoted without further relation to the agent, though there does exist a middle verb so to denote it ; yet, where the two voices exist in actual use, the middle, denoting the action relatively to the agent, as in No. II., is very seldom, if ever, in pure Attic, used to denote the action when it regards another person.

Ex. Gr. *ἰστέναι τρόπαιον* may be said of an army who erect their own trophy : for it is true, as far as it goes, they do erect a trophy.

But *ἰστέσθαι τρόπαιον* cannot be said of him who erected a trophy for others, but ἔστησεν only.

DIRECTIONS

FOR

THE KNOWLEDGE OF QUANTITIES.

§ 1.

In the Greek language, the nature of the vowels decides the length or the shortness of syllables. They are divided into three classes.

Those that are long by nature are, η, ω; and also the diphthongs αι, ει, ου, οι, ου.

The short vowels are, ε, ο.

The doubtful, α, ι, υ; which are sometimes made long, and sometimes short. For instance, in one line of Homer, Il. ε. 30. ἀρεῖς, ἄρεος.

§ 2.

Long vowels and diphthongs become doubtful when followed by a vowel; as in Il. ο. 68.

τὸν δ' ἔχ' | λῶσ' αἰεὶ | γὰρ κτενεῖ | Ἐκτόρ' | δῖος Ἀχιλλεύς.

Here the diphthong ει in κτενεῖ is short, because followed by the vowel ε. Examples of the same are also to be found when an expletive particle, δε, τε, κε, is placed between the preceding long vowel and the following one; or with regard to αι, ου, and ει, when the next word begins with a consonant; as, ἔχ' | ὑξ' οὐ | δούρ' | ἄκωκῃ, *the point of the well-polished dart*.

Poets often take the liberty of shortening a long vowel and a diphthong in the middle of a word; as Il. υ. 437, ἔπει' ῃ :

δοῦρ' βᾶ' | λῶν' ἔπει' ῃ καὶ ἔ' | μὲν βέλλ' | οἷ' πᾶ' | ροῖ' θ' ἔν.

§ 3.

The syllable is long by position, when a vowel is followed by two consonants. The letters ζ, ξ, ψ, are considered as double consonants. Ex. τραπέζα, *a table*; δέξι' τέρε' ῃ, *to the right hand*; ὑψάσθην, *to seize*; χαλκός, *brass*.

The same takes place when a word ends with a short vowel, and the word following begins with two consonants.

§ 4.

An exception to the above rule is made by words in which a mute is found with a liquid.

The *liquid letters* are λ, μ, ν, ρ. The other consonants are called *mute*, in this acceptance. Syllables of this sort are made long or short *ad libitum*; as, τέκνον and τέκνον, πῶτος and πῶτος, *destruction, ruin*.

Observe, here, that Homer allows himself such peculiar and discordant sounds far more rarely than later poets, particularly epigrammatists.

It also sometimes happens that a short vowel is made long before a single liquid; as in Il. α. 4.

ἦρε' ὦν' αὐ' | τοῦς δ' ἔ' | λῶρε' ἄ' | τεύχε' αὐ' | ν' ἔσσι' ν.

Of heroes; them, however, he gave a prey to dogs.

In this sentence, the ε in ἔλωρε' is made long, because it precedes the liquid consonant λ.

§ 5.

A short syllable is sometimes made long by the *cæsuræ*. By *cæsuræ* is understood the division of a word, by which its last syllable belongs to the following foot; as in Il. κ. 270.

Ἀντάρ' ὄ' | Μῆρ' ὀ' | ν' ἡ δῶ' | κ' ἐν ᾧ' | παῖδ' ᾧ' | ρ' ἔρ' ν' αἰ'.

But he gave it to his son Meriones to carry.

The last syllable of *δωκεν* is here evidently long by the cæsure. Homer often makes use of this figure. In the tenth book of the *Iliad*, at least ten instances of it are to be found. The later poets also avail themselves of this license.

§ 6.

Another liberty, which the poets take, is the contraction of two vowels into one, so that they must be scanned as a single syllable. Thus *Il. i. 349*.

η οὐχ ἄλλης, | δὲ γυῖναι καὶ ἄνδρα καὶ ἄνδρα | ἥπερ οὐ πένεαις;
Or is it not enough that thou betrayest weak women?

Here the two words η and οὐχ are pronounced as one syllable. Homer makes an abundant use of these contractions, as do also the other poets.

§ 7.

As the quantity of syllables is most surely learned from hexameters and pentameters, we will now give the scheme of each.

An *hexameter* consists of six feet, composed of spondees and dactyles. The last foot may be either a spondee or a trochee:

— — | — — | — — | — — | — — | — —
or else — — — | — — — | — — — | — — — | — — — | — — —

The rule, with regard to hexameters, is, that the fifth foot must be a dactyle. Homer, however, Hesiod, Aratus, and other poets, often allow themselves the license of placing a spondee in the fifth place.

A spondee is composed of two long syllables; as, *μνημῆ, οἴκοι, αἰθῶν, τέχνη*.

A dactyle is formed of one long syllable, followed by two short ones; as, *τὸν λόγον, the speech; Πινδαρος, Pindar; μῦθος, endless, innumerable.*

A trochee consists of one long and one short syllable; as, *ἦν, was; κῆρυξ, frigate; δοῦρε, two spears.*

The iambus is the reverse of the trochee; its first syllable being short, and its second long; as, *δῶν, an arrow, a reed; μέδων, a ruler; φέρων, bearing.*

The scheme of the *pentameter* is as follows:

— — | — — | — — | — — | — — | — —
or else — — — | — — — | — — — | — — — | — — — | — — —

By this we see, that either dactyles or spondees may be used to form the two first feet.

εὐσὺμ|βοῦλεῦ|εἰν | τοῖσι φί|λοῖσιν ἔ|με.

That I may rightly advise my friends. Phocyl. 38.

κῆρδ' ἔα | δῆμῳ | ὦ | σὺν κακῷ | ἐρχόμε|ν.

Advantages accompanying common misfortune. Phocyl. 50.

ἦ δ' ἄρ' ἐ|τῇ ὀλ|γοῖς | ἔνδρασ| | κῦρ' ἔπ|ε|ταῖ.

But virtue accompanies but few men. Phocyl. 150.

Those who have paid attention to the above fundamental rules will meet with but little difficulty in the scanning of poems written in hexameters and pentameters. The six first rules form the basis of all poetry; and nothing would be easier than to scan Greek verses, did not the doubtful vowels, *α, ι, υ*, add some difficulty to the task.

In this case, as nothing can be decided *à priori*, all depends upon authority; that is to say, upon the manner in which the poets have employed these doubtful vowels, with regard to quantity. We see that, in this respect, much may be reduced to generally received rules, which are of considerable assistance; but in many words we are totally at a loss for such a guide.

RESULTS FROM THE EXAMPLES IN THE POETS.

(1.) Some words are always long, because all the poets agree to use a certain syllable thereof long; e. g. *ἄνδρες, immortal; νῦν, now; μένος, mind; ὀϊστός, more terrific; ἄλγος, cold; νίκη, victory.*

(2.) Some words are, in one poet, always long; but in others, especially the later poets, doubtful. Thus *καλός, beautiful*, is always long in Homer, but doubtful in Orpheus, Theocritus, and the epigrammatists. It is herein important to know which poets use a word constantly long, and which doubtful.

(3.) When a doubtful vowel is followed by two short syllables, it may always be assumed that this vowel is long. The discourse then inclines to a fall, and favours hexameters, to which the Greek language is particularly partial. This is often observed in the

lengthening of a word; *θύγᾱτρε*, also the accusative *θύγᾱτρεα*, is short; but *θύγᾱτρεα* and *θύγᾱτρες* invariably lengthen the first syllable. If, therefore, by the fall or rise of syllables, in trochaic and iambic metre, the doubtful vowel of a Greek word comes into a position which requires a long sound, it will certainly be used long.

(4.) A doubtful syllable between two long ones is, in heroic metre, always long; e. g. *Λαϊστρυγῶν*, a *Læstrygon*; *ναρκισσῶτην*, *narcissus*-like, a *stone*, *Dionys. Per. 1031*; *μητι-σασθαι*, to *contrive*.

(5.) Words are regulated in their quantity by the primitive or radical word; e. g. from *ἴθυς*, *straight*, come *ἴθυνταρ*, *ἴθυνος*, *ἴθυνω*; from *νίκη*, *victory*, *νικάνδρος*, *νίκιας*, *νικάω*; from *θῦμος*, *mind*, *soul*, *θῦμηρης*, *θῦμηδω*, *θῦμων*, *θῦμωδης*, *θῦμομα*, &c. Hence words derived from long radical syllables may easily be determined of themselves.

(6.) Exceptions from this rule are, monosyllabic words in *υρ*, which are long in the nominative, but become short in the lengthened terminations; as, *πύρ*, *πύρδος*: also words in *υς*, having *υος* in the genitive; as, *σὺς*, *σῶς*.

(b) The following important rule for determining words derived from verbs is given in the *Halle Greek Grammar*, twentieth edition, pp. 325, 326:—"The first future of liquid verbs, and the second future of all verbs, together with the tenses and derivatives formed from them, (except the aorists from the first future,) shorten the doubtful vowels, although they were long in the present, or arise from a long vowel; as, *κρίνω*, *I judge*, *κρινῶ*, *κεκρίκα*, *κεκριμαι*, *κρίμα*, *κρίσις*, *judgment*; *τρίβω*, *I rub*, *τρίβω*, *τετρίβα*, *τρίβος*, *τρίβη*."

(6.) In several words *α* is long when it is used Doric for *η*. This rule, expressed generally, is as follows: the Doric *α*, when put for *η*, *ω*, and *ι*, is long; as, *φάμα*, *πράτος*, *αἰκά*, for *φημη*, *πρωτος*, *εἰκα*. (*Halle Gr. Gram.* p. 326.) As beginners are at first liable to error in this particular, we shall adduce some examples from the first *Idyl* of Theocritus:—verse 1. *ἄδν*, for *ἡδν*; *ἄπιτυς*, for *ἡπιτυς*.—v. 2. *ἄ*, for *ἡ*; *πάγαισι*, for *πηγαισι*; *ἄδν*, for *ἡδν*.—v. 4. *αἰκά*, for *εἰκα*.—v. 5. *αἰκά*, for *εἰκα*.—v. 7. *ἄδιον*, for *ἡδιον*; *κατᾱχες*, for *κατᾱχες*.—v. 8. *τᾱς*, for *τῆς*.—v. 9. *αἰκά*, for *εἰκα*; *τᾱν*, for *τῆν*.—v. 10. *σᾱκίτην*, *fed in the fold*, for *σηκίτην*.—v. 11. *τᾱν*, for *τῆν*.—v. 12. *τᾱν*, for *τῶν*.—v. 17. *τᾱνικα*, for *τηνικα*; *κεκῆκως*, for *κεκμηκως*.—v. 18. *χολᾱ*, for *χολη*.—v. 20. *τᾱς βωκολικᾱς*, for *τῆς βωκολικῆς*.

These examples will be sufficient to explain the difficulty to a beginner, should he meet with an *α* in the Doric poets used as long, though by the rest of the rules it should be short.

PARTICULAR CASES.

As in many verses the quantity belonging to one syllable or another is not immediately apparent, we conceive it will be of no small advantage to the beginner, in the study of prosody, to bring forward some particular cases for his examination. We shall select such anomalies, and remarkable changes, as will, if attentively studied, serve to remove the difficulties which frequently occur in a complicated verse.

§ 1.

Short Syllables made long by Cæsure.

It has already been observed, *Directions*, p. 619, that, in the poets, the cæsure has the power of lengthening a syllable which is of itself short. As, without a more accurate observation of this poetical license, the decision, whether a syllable be long or short, might be attended with uncertainty, let us here adduce several examples of this kind:—

(1.) *ἐκπῆρ|σαῖ Πρῶ|μοῖδ' πῶ|λιν*, *εὐ δ' | οὔκ'ᾰδ' | ἵ|κεσ|σαῖ*. II. α. 19. The syllable *λιν* in *πολιν* is long by cæsure.

(2.) *τῶξ' | ὦ|μοῖδ' ἔ|χῶν*, *ἄμ|φῆρ' ἔφ' | ἄ τ' ἔ|ρετην*. II. α. 45. The *α* in *αμφηρετα* is long merely by cæsure.

(3.) *ᾠ | Ἀχ' | λ'εῦ*, *κ'ἔλ' | αῖ μ' ἔ', | δ' | φ'ίλ'ε*, *| μῦθ' | σᾱσ|σαῖ*. II. α. 74. The *ι* in *δ'ι* is long by cæsure. In like manner:

(4.) *μῆν' | Ἀπολλ' | ῶς*, *ἔκ' | ἄτ' ἔλ' | τᾱδ' | ἄν' αἰκ' | ῶς*. Ibid. 76. The last syllable of *Ἀπολλωνος* is evidently long by reason of the cæsure alone.

(5.) *θ' | ἄρ' ὅτ' | ἄς ἄλ' | εἰπ' ἔθ' | ὅτ' ῥ' ἄν' | ὄν*, *δ' | τ' | οὔσ' | θ' | ὅτ' ῥ' ἄν' | ὄν*. II. α. 85. The *ον* in *θεοπροπιον* is the cæsure.

§ 2.

Length of a Vowel before a Liquid Letter.

It has been already stated, that every short, and also every doubtful vowel, can be used either short or long, when followed by a mute with a liquid; although, otherwise, position makes every syllable long. The shortening is exemplified in II. π. 857:

ὄν πῶτ' | μῶν γ' ὄδ' | ὠσᾱ, λ' | ποῦσ' | ἄνδρ' | ἑτ' ἄ κα' | ἱβ' ἦν.

Here *ανδρο* forms two shorts.

But the anomaly is greater when the poets lengthen a short or doubtful vowel before a single liquid :

τοῦς τῷ δὲ | ἀμῆλ' ἰστέ τᾷ | μῶν ᾧ | πλίσσ' αὐτῷ | δ' ὅρπ' ὦν. Od. i. 291.

Here the α in *διαμύλαισι* is long, evidently, because it is followed by the liquid μ.—*Ἐλῖτ' ἔ-
νεύεν*. Od. η. 145.—*κατὰ νῆυσιν*. Od. i. 490.

§ 3.

Diphthong shortened before a Consonant.

That long vowels or diphthongs can be used short before the initial vowel of a following word is already known: e. g. *γνώσῃ* ἔ|πειθ'. Il. β. 365. But the shortening of diphthongs, also, before a consonant, e. g. before δ, though very uncommon, yet occurs, even in Homer :

γνώσ' αἶ | δ' εἴ κατ' | θ' ἑσπεύ' ἢ | πύλιν | οὔκ ἄλλ' | παῖδας. Il. β. 367.

§ 4.

Shortening of a Resolved Diphthong.

When a diphthong is resolved into its constituent parts, the separated vowels are short :

τῶν ἦρ' αἶ | Ἄδμη | τοῖσ' φῖ | λῶς παῖς | ἐν δ' ἑκά | νηϊν. Il. β. 713.

§ 5.

Long Vowels and Diphthongs made short before a Vowel in the same Word.

The shortening of long vowels and diphthongs, even in the same word, belongs to the more remarkable instances of poetical license. This, however, frequently occurs, as is shown by the following examples :—

(1) *επειγ* :

καρπὸν ἔ | θηλῇ | σῶντ', ἔπει | ῃ μᾶλ' | πόλλ' αἶ | μ' ἐτ' αἶψ'. Il. α. 156.
οὐδ' ἔθ' αἶ | ῶν μᾶκ' αἶ | ρῶν. ἔπει | ῃ πῶλ' | φέρ' ἐρ' οἶ | σ' ἔμην. Od. ι. 276.
ἱπποῦς | δ' ὠρ' ῃ | σαῖτ', ἔπει | ῃ πῶλ' | φέρ' ἐρ' οἶ | σ' ἔμην.
ἥμ' αἶ | τοῦς ἀλ' | λουῖς, ἔπει | ῃ πῶλ' | φέρ' ἐρ' οἶ | σ' ἔμην. Il. υ. 135.

So, also, Il. υ. 437, and in many other passages.

(2) *νῖός, νῖόν, νῖέ* :

κατ' βαλ' ἔν | Ἀμφι | ῶν, ἔλ' αἶ | γού νῖόν, | ός ῥ' ἐν | Παῖσ' αἶ. Il. ε. 61.
ἦδ' αἶ | φῖ Κρεῖ | σ' ὀντος νῖ | ῶν Ἀνδ' | μ' ἦδ' αἶ | σ' ἔμην. Il. ι. 84.
Ἐκτ' ῥ', νῖ | ῖ Πρῖ | αἶ μοιό, δ' ἔ | μ' ῃ τιν' ἄτ' αἶ | λῶντ' αἶ. Il. λ. 200.

This last verse affords several confirmations of the preceding exceptions. The syllable *νῖ* in *νῖός* is short before *ε*. The syllable *δ'ε* in *δ'εῖ* is long from a double cause: (1) on account of the *cæsure*; and (2) on account of the liquid *μ*. The syllable *τιν'* in *μ' ῃ τιν'* is long by *cæsure*.—*Ἐκτ' ῥ' νῖ | ῖ*, *Πρῖ | αἶ μοιό*, &c. Il. ο. 244.—*νῖός*. Il. ρ. 575. Il. σ. 105. Od. η. 312. And so in several passages.

(3) *βῆβληαῖ* :

βῆβληαῖ, | οὐδ' αἶ | λῖ | ὦν βῆ | λῶς | ἔκφ' ὕ | γ' ἐν, ᾧς ὁφ' ἔ | λῶν τοῖ. Il. λ. 380.

(4) *ἦρ' αἶος, ἦρ' αἶ* :

ἦρ' αἶος. | ἀλλ' ὀπ' ὀτ' | ἄν σ' ἔ | μοι κ' ἐν | θ' ὠοῖ κατ' | αἶ λῃ. Od. ζ. 303.
ἦρ' αἶ | δ' ἡμ' ὀδ' | κ' αἶ. ὅ δ' ἔ | δ' ἔξ' αἶ, | χαῖρ' ἔ | δ' | θ' ὠμ' αἶ. Od. θ. 483.

(5) *ἔχουσιν* :

ἐν δ' ἄρ' ὕ | δ' ὠρ' ἔ | χ' ὕ | ἄν, ὕπ' ὀ | δ' ξ' ὕ | λ' αἶ | δ' αἶ ὦν ἔ | λ' ὠοῖ σαῖ. Od. θ. 436.

(6) *τετληότες* :

χερ' ὅς αἶ | τετ' ἄ | ῃ ῥ' | τ' ἔν' αἶ | αἶ ἔμ' αἶ | αἶ ἔλ'.

This verse wants a foot.

Orph. λ'. *Οφ' ἰτης*, 37. Gesner's edit.

(7) *παλαῖος* :

παλαῖος. | παλ' αἶ | ὦς δ' ἔ | λ' ῥ' ὦς π' ἔ | λ' | τοῦδ' ἔ | φ' αἶ ἔλ'.

Orph. Fragn. N. ii. v. 9: edit. Gesner. p. 360.

Orpheus has several such shortenings, e. g. *ibid.* p. 359. *δῖκαῖων*.

(8.) γέρεαίους. Tyrtæus *Analecta*, tom. 1. p. 80.

(9.) ποίησω :

τῖ σοῖ | θῆλοῖς | ποιῇ|σῶ. Anacreon xii.

§ 6.

Shortening of Position.

According to the general rule, (see above,) position renders a syllable long; and the mute with the liquid only has, agreeably to custom, the prerogative of using a short vowel, standing before it, either long or short, at pleasure. So much the more extraordinary are the cases where a position, which contains no mute with the liquid, is nevertheless short :

Καλκιδᾶ | τ', Εὐρετρία | τῆ, πό|λυτᾶφύ|λῶν θ' | Ἰοτῖ|αῖων. *Il.* β. 537.

The syllable *ρε* in *Εὐρετρία* can be used short, by reason of the mute with the liquid. But with *Ἰοτῖαιων* this is not the case; and therefore the abbreviation is the more anomalous.

Another rare example of this kind is afforded in *εὐγδουπον* :

ἔκ θ' ἔλδ|σῶν πρῶθ'υ|ροῖσ' καὶ | αἰδοῦ|σῆς ἔρ'|γδοῦποῦ. *Od.* ο. 146.

So, ἄλλ' δ'τῆ | δῆ γδδ|δ'ων μοῦ ἔ|πιπλῶμ'ῆ|δ'ων ἔτ'ος | ἦλθ'. *Od.* η. 261.

§ 7.

Unusual Lengthening of Short Syllables.

In the Greek poets, instances frequently occur, where, without the sanction of a cæsure, or any other reason, short syllables, possessing the lowest prosodial value, are raised to the dignity of the long. This can be considered as nothing but a poetical license and an overstrained freedom.

(1.) παρ :

νῦν δ' ἔ μ'ῆ | παρᾶ|ποῦσ' ἄλδ|χ'ος μάλλ'α|κοῖς ἔπ'ῆ|ῆσ'σιν. *Il.* ζ. 337.

(2.) The syllable *κεν* :

τῆς θ' οἷδ' | εἰκ'εν | οἱ σῦν | δαῖμ'ον' | θ'υμ'ον' δ'ῖρ'ενφ.

(3.) ὄς :

ὄς οἱ | καὶ τ'ῶτ' | παῖδ'ος ἄ|π'ο χ'ρ'δ'ος | ἦρεκ'σ' ὀ|λῆθ'ρ'ον. *Il.* ο. 534.

κ'ηρ'ῶν' | Ἥπ'ῦτ'|δ'ῆ, ὄς | οἱ π'ᾶρ'α | π'ᾶτ'ρ' γ'ῆ|ρ'δ'ντ'. *Il.* ρ. 324.

(4.) απο :

μ'η'ν' ἄ|π'ο εἰ|πῶν ἄγ'α|μ'εμ'ον' | ποῖμ'εν' | λᾶων. *Il.* τ. 35.

(5.) In *αμφοτερησι*, *Od.* δ. 116, it must either be assumed that *ῥησι* is used by the poet as a trochee, for a spondee, or that *σι* is altogether unusually made long :

ἄμφοτ'ῆ|ρ'ῆσι | χ'ρ'σ'ῖ νό|ῆσ' δ'ῆ | μῖν Μ'ῆν'ῆ|λᾶς.

(6.) *ον* unusually made long in *υῖον* :

ῆ ῥᾶ καὶ | Ἐρμ'ᾶ|ῶν φῖλ'ον | υῖον | ἀντῖον | ἦνδ'ᾶ. *Od.* α. 28.

(7.) *ο* lengthened before *λ* in *Λιόλου* :

δωρᾶ π'ᾶρ' | Λιῶ|λοῦ μ'εγ'α|λ'ητ'ρ'ος | Ἰπ'ῶτ'ᾶ|δ'ᾶ. *Od.* κ. 36.

So, also, *Od.* κ. 61. The remark made elsewhere, that, in heroic verse, a short syllable included between two long ones is used as long, applies also here.

(8.) The syllable *δι* in *διος* :

πρᾶξ'ῖδ'ε|κ'η, ἔρδ'ε|τ'οπλ'δ'κ'ᾶ|μ'ε, δ'τ'ος θ'ᾶλ'ος | ᾗγ'ον. *Orph. Hymn.* 28. 5.

That the last syllable in *ερατοπλοκαμα* is long, arises from the cæsure; but that *δι* should become long in *διος*, is somewhat unusual.

(9.) Syllable *ο* made long in *ὄπον* :

βᾶψ'ᾶς | ἔκ π'ῦρ'ος | δ'πον, ἔν | αῦχ'ῆν'|αῖς δ'δ'ῶ|ναῖσ'ι. *Orph.* λ'. Κορυμφος, 8.

(10.) ὀπ'σᾶ|τῶ Ζεῦς. *Quint. Calab.* β'. 619.

(11.) Σιὸδοσιον. *Egigt.* 12. p. 407.

(12.) τῆς : *Il.* ζ. 459. 462.

καὶ π'ῶτ' | τῆς εἰ|π'ῆσιν ἱ|δ'ῶν κ'ᾶτ'ᾶ | δ'ᾶκ'ῶ χ'ῆ|οῦσ'ᾶν.

ῶς π'ῶτ' | τῆς ἔρδ'ῖσ' σοῖ | δ' αῦ ν'ῶν | ἱσ'ῆτ'ᾶ | ἄλγ'ος.

In like manner *τῆς* is used long. *Il.* η. 91.—τῖ φῖλ'ον | σοῖ. *Od.* η. 320.—τῖ ἱσ'ῆσιν. *Od.* ξ. 89.

But the anomaly is greater when the poets lengthen a short or doubtful vowel before a single liquid :

τοῦς τέθ' | ἀμείλι | τοῖς τέ | μῶν ὦ | πλίσσ' αὐτὸ | δόρηδ' ὦν. Od. i. 291.

Here the α in δαμολισσι is long, evidently, because it is followed by the liquid μ.—εἰλίσσ' αὐτὸν. Od. η. 145.—καταμῶν. Od. i. 490.

§ 3.

Diphthong shortened before a Consonant.

That long vowels or diphthongs can be used short before the initial vowel of a following word is already known: e. g. γυνώσῃ | εἰ | πεῖθ'. Il. β. 365. But the shortening of diphthongs, also, before a consonant, e. g. before δ, though very uncommon, yet occurs, even in Homer :

γυνώσ' αἶ | δ' εἰ καὶ | ὅ | ἔσπεσ' οἱ | ἦ | πόλιν | οὐκ ἄλλ' | παῖδες. Il. β. 367.

§ 4.

Shortening of a Resolved Diphthong.

When a diphthong is resolved into its constituent parts, the separated vowels are short:

τῶν ἦρ' αἶ | Ἀθμῇ | τοῖς φῖ | λὸς πᾶϊς | εἰ | δ' ἔκ' αἶ | νῆ | ῶν. Il. β. 713.

§ 5.

Long Vowels and Diphthongs made short before a Vowel in the same Word.

The shortening of long vowels and diphthongs, even in the same word, belongs to the more remarkable instances of poetical license. This, however, frequently occurs, as is shown by the following examples:—

(1.) *επεῖη :*

κᾶρπον εἰ | δ' ἡλῇ | σᾶντ', εἰ | πεῖ | ἦ | μᾶλ' | πῶλλ' αἶ | μ' | τᾶξ' ὦ. Il. α. 156.

οὐδ' ὅ | εἰ | ῶν μᾶκ' | ῥῶν' εἰ | πεῖ | ἦ | πόλιν | φέρ' ἔρ' οἶ | εἰ | μέν. Od. ι. 276.

ἱπποῦς | δ' ὠρῇ | σαῖ | κ' εἰ | πεῖ | ἦ | πόλιν | φέρ' ἔρ' οἶ | εἰ | σίν.

ἦ | μᾶς | τοῦς αἶ | λουῖς, εἰ | πεῖ | ἦ | πόλιν | φέρ' ἔρ' οἶ | ἦ | μέν. Il. υ. 135.

So, also, Il. υ. 437, and in many other passages.

(2.) *υῖος, υῖον, υῖε :*

καὶ βᾶλ' | Ἀμφι | ὦν, Σῆλ' | γοῦ υῖ' ὦν | ὅς ῥ' ἐν' | Παῖσ' αἶ. Il. ε. 61.

ῥ' δ' ἄμ' | φῖ | Κρεῖ | ὦν τὸς υῖ' ὦν | Ἀχδ' | μῇ δ' ἔα | δῖ' ὦν. Il. ι. 84.

Ἐκτόρ, υῖ' | Πρῖ | ἄμ' οἶ' δ', δῖ' | ἰ | μῇ | τῖν' ἄτ' αἶ | λαντ' ἔ. Il. λ. 200.

This last verse affords several confirmations of the preceding exceptions. The syllable *υῖ* in *υῖς* is short before *ε*. The syllable *δῖ* in *δῖ' ἰ* is long from a double cause: (1) on account of the *cæsura*; and (2) on account of the liquid *μ*. The syllable *τῖν* in *μῇ τῖν* is long by *cæsura*.—Ἐκτόρ υῖ' | Πρῖ | ἄμ' οἶ' δ', &c. Il. ο. 244.—υῖ' ὦς. Il. ρ. 575. Il. σ. 165. Od. η. 312. And so in several passages.

(3.) *βῆλ' αἶ :*

βῆλ' αἶ, | οὐδ' ἄλλ' | ὦν βῆλ' ὦς | ἔκφ' ὕγ' ἔν | ὦς ὁ φ' ἔλ' ὦν τοῖ. Il. λ. 380.

(4.) *ἦρ' ὦς, ἦρ' ὦι :*

ἦρ' ὦς, | ἄλλ' ὅ | π' ὦτ', | ἄν σ' ὅ | μοῖ κ' ἔκ' ὦ | ὦσ' αἶ καὶ | αὐλῇ. Od. ζ. 303.

ἦρ' ὦι | δ' ἡμ' ὁδ' ὁ | κ' αἶ. ὅ δ' εἰ | δ' ἔξ' αὐτ' ὦ, | χαῖρ' ἔ δ' ἔ | ὦμ' αἶ. Od. θ. 483.

(5.) *εχέυαν :*

ἐν δ' ἄρ' ὕ | δ' ὦρ' εἰ | χέυ' αἶν, ὕ | π' ὦ | δ' εἰ | ξύλ' αἶ | δ' αἶν εἰ | λουῖσ' αἶ. Od. θ. 436.

(6.) *τετλήσσι :*

χερ' ὅς σ' ἔ | τετλ' ὅ | τ' ὦσ' αἶ | αἶν εἰ | μέν | αἶν.

This verse wants a foot.

Orph. λ'. Οφίτης, 37. Gesner's edit.

(7.) *παλαῖος :*

ἀθ' ἀν' αἶ | τῶν. πᾶλ' αἶ | ὦς δ' ἔ | λ' ὦς σ' ἔρ' | τοῦδ' ἔ φ' αἶ | εἰν.

Orph. Fragm. N. ii. v. 9 : edit. Gesner. p. 360.

§ 10.

Verses of difficult Scansion.

The explanations given in the preceding paragraphs will serve to facilitate the scansion of difficult verses:—e. g. in Od. ε. 79. assistance is afforded by the remarks on resolution.

(1.) οὐ γὰρ τ' | ἄγνῳ|τῆς γῆ θῆ|οι ἀλλῇ|λοῖσ' αἰ|δόνταί.

The last syllable in θῆοι dissolves with αἰ into one syllable.

(2.) τῶσ' αἰ|δὼρ ἄπ' ἄπ' | λῆσ' ἔτ' | ἄ|π' αἰ|δὼρ γῆ | ἄμ' αἰ|δὼρ | πῶσ' αἰ. Od. λ. 585.

The explanation for ἀναβροχθῆν is given § 6

(3.) In Od. π. 102. as there is a superfluous syllable, no other expedient is left, but the adoption, according to § 9, of a different foot:

αὐτῶν' ἄπ' | ἔ|μ' αἰ|δὼρ κα|ρῇ τῶμ' | ἀλλ' αἰ|δὼρ|τῆς φῶς.

Here the first pæon (— ∪ ∪) supplies the place of the dactyle at the beginning. We might also scan,

αὐτῶν' ἄπ' | ἔμ' αἰ|δὼρ κα|ρῇ.

The second pæon then forms the second foot (∪ — ∪).

(4.) In Od. τ. 246. the remedy is easy, if αμοις be read for αμοισιν: otherwise the third foot has an *Ioniens à majori* (— — ∪):

γυρὸς ἔ|τῇ ὠ|μῶσιν μῆλ' αἰ|δὼρ γυρὸς | οὐλ' αἰ|δὼρ|τῆς.

(5.) In Od. φ. 203. there is a deficiency of one or two syllables:

εἰ μὲν ἔτ' | ἔμ' αἰ|δὼρ | εἰτ' αἰ|δὼρ, ἢ τῆς | ἢ τῆς.

After λῆχος, another syllable at least, or a word, ought to stand. Probably the word γυναι is here wanting, which, on account of the succeeding vowel, contains two short syllables, and therefore forms a dactyle with the syllable λῆχος.

(6.) The verse 284. Arat. φ. has a syllable too many; unless, according to § 8, we are disposed to assume a solution:

θ' ἔτ' αἰ|δὼρ τῆς αἰ|δὼρ αἰ|δὼρ. ὅδ' οἰ|κιστῆς | αἰ|δὼρ|τῆς.

(7.) In Hes. Epy. 434 the difficulty of scansion arises on account of πεννῶν, whose first syllable is otherwise long; and of γυν, whose first syllable is otherwise short:

δρῶς ἔ|λῳμ' αἰ, πεννῶν γυνῶν, βῶς | δ' εἰ|δὼρ|τῆς.

It cannot well be divided differently; and yet πεννῶν, πεννῶν, Arat. Diosem. 390. is long; and γυν, Hes. Epy. 426. short.

(8.) Orph. Ν. Οἰτις 50. is difficult to scan, on account of the word Παλαμῆδαι:

τοῦν' αἰ | Παλ' αἰ|δὼρ αἰ|δὼρ αἰ|δὼρ | οὐλ' αἰ | τῶσ'.

The syllable Πα in Παλαμῆδαι can be long, because λ is a liquid letter, according to § 2. But the shortening of μῆ in this word occasions too much harshness. Hence it appears to us to be the best way to regard the second foot, according to § 9, either as an amphimacer, Παλ' αἰμῆ, or as an anapest, Παλ' αἰμῆ.

(9.) The usual reading, Arat. Diosem. 108. involves a difficulty:

αἰ δ' | οἰ' αἰ|δὼρ τῆς | αἰ|δὼρ | δρῶς|τῆς.

According to this disposition of the verse, the first foot is a trochee (— ∪), and falls under § 9. The Moscow MS. reads αἰ δ' αἰ | οἰ' αἰ|δὼρ τῆς. Stobæus has αἰ δ' αἰ | οἰ' αἰ|δὼρ τῆς. Other MSS. have αἰ δ' αἰ | οἰ' αἰ|δὼρ τῆς: and then the whole proceeds in the regular course.

If a verse is complete, it is called *acatalectic*; if a syllable is wanting, *catalectic*; if a foot, *brachycatalectic*; if a foot or a syllable is redundant, *hypercatalectic*.

A *metre* generally signifies a combination of two feet; except in dactylic verse, and in the metres composed of double feet.

Where a verse of a given species consists of two feet and a half, it is called a *penthemimer*, as consisting of five half feet; of three and a half, a *hepthemimer*, as consisting of seven half feet.

There are nine principal species of metres, dactylic, anapestic, iambic, trochaic, Ionic a majore, Ionic a minore, choriambic, antispastic, and epitritic. A verse, in which two dissimilar species are united, is called a *mixed* metre.

Other varieties are the following :

Monom. hypercat. or penthemimer : δορὶ δῆ, δορὶ πτε|σαν. Hes. 897.

Dim. brachycat. κρίνει τρισσάς | μακάρων. ib. 641.

Dim. catalect. in a dissyllable: ποσὶν ἔξανύσαι | μι δι' αὖ | θύρας. Ph. 166.

Dim. hypercat. οὐθ' ὁ παρὰ τὸν Ἀχέροντα θεὸς ἀνάσσει. Soph. El. 184.

On the Aristophanic anapestic, or tetrameter catal., see also Porson.

Iambic Metre.

The following is the scale of the trimeter acatalectic, or senarius, constructed according to the rules of Porson :

[illegible]

Other species are :

- Monom. acatal. *τω τείας : κωφας | ἔχον : ἔχον ἤπασον.*
 Monom. hypercat. or penthem. *χρυσίαν : ἐνέπτερον.* Hec. 913.
 Dim. brachycat. *τακτον ἑμῶν : γείας.* ib. 1066.
 Dim. catal. or hephthemim. *ἄλυστορος : τις αἰχρῆς.* ib. 936.
 Dim. acatal. *ἐγὼ θε πικροῖσιν ἀνδράσι.* ib. 911.
 Dim. hypercat. *ἀνταρτας : ἴδν λ' ἔχον ἀντὶ τοῦ ἐγ' εἰ, | τι.* Or. 150.
 Trim. brachycat. *ὕμνητα παιδοποιον ἅ | δοντ.* Ph. 348.
 Trim. catal. *ἔχον ἑμ' ἑς : τι νεύσιν τωμ' ὄν αἶφον.* Ph. 1727.

Trochaic Metre.

The following is the scale of the catalectic tetrameter : (See FORM.)

Other species of trochaic verse are :

- Monom. acat. or basis trochaica : *ἀστέφανος.*
 Monom. hyperc. or penthem. *τί περ' ἀναστήναις ;* Hec. 183.
 Dim. brachycat. or *ulyphallic* : *δακτύλοις ἱλίσσας.* Orest. 1431.
 Dim. catal. hephthem. *τῶν ἀπορθεῖ|των πόλεις.* Hec. 894.
 Dim. acatal. *ποι τράπωμαι ; | ποι πορευθῶ ;* ib. 1082.
 Dim. hypercat. *Ἄς ἔγγυ' ὅ | τοῖστας Πάρις.* Orest. 1408.
 Trim. brachycat. *ὦ τέκνον, τί|κνον ταλαίρας | ματρός.* Hec. 688.
 Trim. catal. *κατθανεῖ, κα|πός σ' ἀποκταί|γει πάσις.* Orest. 1467.
 Trim. acatalect. ; Bentley affirms that this metre is unknown to tragedians or comedians. Gaisford thinks that the two following are legitimate instances :
αἰδ' ἀλλά|ῖα ταχύ|βῶστος παλαιός. Soph. Oed. C. 1061.
καὶ πασι|γνῆ|ταν πυννοσσι|κτων ὀπαδόν. ib. 1092.
 Trim. hypercat. *ἤλθον εἰς δό|μους, ἐν' αὐθ' ἑ|καστέ σοι λέ|γω.* Eur. Or. 1398.

Ionic a majore.

An Ionic verse *a majore* admits a *trochaic syzygy* promiscuously with its proper foot; the second pæon in the 1st place; also a molossus in an even place of a trimeter whole or catalectic. Resolutions of the long syllable are allowed in all possible variations.

- Monom. hypercat. or penthem. *πτώσσουσι μυ|χῶν.* Hec. 1048.
 Dim. brachycat. *καὶ σῶφρονα | πάλαις.* Phœn. 182.
 Dim. catal. *ἦ Παλλὰδος | ἐν πόλει.* Hec. 465.
 Dim. acatal. *δάφνα θ' ἰ|σχροῦς ἀνίσχε.* ib. 458.
 Dim. hypercat. *νῦν δ' οὗτος ἀ|ναίται στυγ|ρῶ.* Soph. Aj. 1232.
 Trim. brachycat. *οἰκτρῶν βιο|τῶν ἔχουσαν | οἰκοῖς.* Hec. 456.
χαῖρ', εὐ|τυχ|ῆ|ε δ' αὐτὸς δό|μιλ' αἶς. Or. 348.

If the three remaining pæons, or the second pæon in any place but the first, or if an *iambic syzygy*, or an *epitrite*, be found in the same verse with an Ionic foot, the verse is then termed *epionic*.

Ionic a minore.

An Ionic verse *a minore* admits an *iambic syzygy* promiscuously, and begins sometimes with the third pæon, and sometimes with a molossus, which is admitted in the odd places. Resolutions of the long syllable are also allowed.

- Monom. hypercat. or penthem. *μαλίας μα|τρός.* Hec. 185.
 Dim. brachycat. *ἐπὶ τὰνδ' ἰασ|υθ' αἰς.* ib. 1066. (*τὰνδε οὐδαῖς.* Por.)
 Dim. catal. or hephthem. *ἰλάτας ἀκρ|οκόμοις.* Phœn. 1540.
 Dim. acat. *παρὰ κλῖνονσ' | ἐπὶ κρανί.* Æsch. Ag. 721.
 Dim. hypercat. *μοῖσδ' αἰῶ|να διέκ|ουσα.* Phœn. 1537.
 Trim. brachycat. *διὰ δ' ἔργου|σιν Μυρτίλου | φόνον.* Eur. Or. 986.

An *epionic verse a minore* is constituted by intermixing with the Ionic foot a *trochaic syzygy*, an *epitrite*, the second or fourth pæon, or the third in any place but the first.

Choriambic Metre.

A *choriambic* verse sometimes begins with an *iambic syzygy*, and generally ends with one either complete or catalectic. It also sometimes ends with a *trochaic syzygy* :

- αὐτὸ δ' αἰ|κτοῖ δ' ἀνῶσ'*
καὶ χ' ὀδ' ἰῶ | κ' ῖς πύγῃ. Æsch. S. c. Th. 733. 734.

The verses corresponding to these, in the antistrophe, are :

καὶ ἀβελῶν | ἀνὴρ τοῖον
αἰῶνά δ' εἶ | τεύξεν μέγας.

Monom. ὦ μοι ἔγωγε. Eur. Hec. 1039.

Monom. hypercat. or penthem. τὰς γυναῖκας. ib. 1053.

Dim. brachycat. ἔλιος αὐτῶν. ib. 634.

Dim. catal. or hephthem. πορφυρὸν εἶλε τάλας. ib. 1088.

Dim. acatal. ἐπὶ κλάδοις | ἐχομένα. Phoen. 1532.

Dim. hypercat. ὁπλὲς πρότερον | αἰδέομαι δύναι. Soph. Aj. 1211.

Trim. brachycat. πάλιν ἄρα τις | αἰδέομαι | αἰδέομαι. Eur. Ph. 1559.

If any other foot of four syllables is joined with a choriambus, the verse is sometimes denoted *epichoriambic*.

Antispastic Metre.

An antispast is composed of an iambus and a trochee (— | —). To lessen the labour of composition, in the first part of the foot, any variety of the iambus, and in the second, any variety of the trochee, is admitted. Hence we get the following kinds of antispast :

1.	2.
$\begin{array}{c} \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \end{array}$	$\begin{array}{c} \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \end{array}$

Instead of an antispast, an iambic or trochaic syzygy is occasionally used :

$\begin{array}{c} \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \end{array}$	$\begin{array}{c} \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \end{array}$
---	---

The second foot of the iambic syzygy also admits a dactyle :

$\begin{array}{c} \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \end{array}$	$\begin{array}{c} \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \\ \cup \quad \cup \end{array}$
---	---

A *dochmius* consists of an antispast and a long syllable (— — — —) : therefore a simple dochmiac is the same as an antispastic monom. hypercat. ὅθ' ἄν ἢ δέων.

A pure dimeter dochmiac is not of frequent occurrence : the fourth of the following lines is one :

ἀλλ' ἔμηνον τίς ὤς | ἔς ἀντλὸν πέσων
λεχρὸς, ἐκπέση | φίλῳς παρδίας
ἀμείρουσ' ἴδ' | τὸ γὰρ ἐπ' ἐγγύθεν
δίκῃ καὶ ὁδοῖαν οὐ ξεμπιτνεῖ. Hec. 1010—1013.

Other varieties of the dimeter dochmiac may be found in the chorus in *Æsch. S. c. Th. 79*. ed. Blomf.

δαί πάλιν ὡς ἔσθ' | προδρόμους ἐκπέσας.
ἀπ' ἄλλου δίκῃ | ὅθ' ἔσθ' ὁδοῖαν.
ἀντλὸν δέων | δ' ὕπερ τεύχεων.
τίς ἀπ' ὁδοῖαν, | τίς ἀπ' ἐπ' ἀρκεῖται ;
πάλιν καὶ σιδήρεων | πότ' εἰ μὴ νῦν, ἀμ—φί.
οὐ τ' ἄρ' ἔσθ', φεῖ, φεῖ, | Κἀμοῦ ἐπ' ἀντλὸν.
ἐν τῇ μάχῃς μάχων | ἀνδρῶν πρὸ πάλιν.
ἴδ' ἔσθ' | ἔσθ' ἔσθ' : with an iambic syzygy.

A dochmiac is sometimes connected with a cretic, either pure or resolved :

ἐπ' ἀντλὸν | ἔσθ' ἐπ' ὁδοῖαν. *Æsch. S. c. Th. 151*.
τὰς δὲ πύργους ὁδοῖαν πάλιν. ib. 154.

A *pherecratean* verse consists of an antispast and a bacchiuss.

αὐρᾷ, πόντι|ς αὐρᾷ. Hec. 445.
τοὶ μὲν γὰρ πόντι|ς πύργους
πᾶνδρμι, πᾶνδρμι
οἱ γὰρ οἱ. τὴν γὰρ
τοὶ δ' ἐπ' ἀμφί|βροχίον
ἴδ' οἱ | πᾶνδρμι
χρῆμα δ' ἀμφί|βροχίον. *Æsch. S. c. Th. 262—267*.

Antispastic dim. acatal. or *glyconic*. This verse admits any kind of antispast in the first place ; but, in the second, only an iambic syzygy.

ἄλ' οὐκ ἐπ' ἀντλὸν | ἐκπέσας. Soph. Phil. 140.
δοῦλ' ἄν ψαλφῶν ἀντλὸν. *Æsch. S. c. Th. 312*.

Antispastic dim. *bacchiuss*. ἐπ' οὐκ ἐπ' ἀντλὸν. Hec. 447.

hypercat. ἐπ' οὐκ ἐπ' ἀντλὸν | μόνον γὰρ οὐδ' ἄν. ib. 688.

ἀντλὸν πᾶνδρμι τάλαντον. ib. 455.

τάλαντον ἀντλὸν σ' ἀμφί|βροχίον. ib. 901.

trim. brachycat. τάλανται τάλανται πύργους | Φρυγῶν. ib. 1046.

catal. or hendecasyllable:

ἄθυροισι δ' οἷά τιν' ὁραμὸν τε βάνχαι. Eur. Or. 1502.

ἢ ματροκτόνον αἷμα χεῖρσι θάσσαι. ib. 824.

ἔτλα καὶ δαίνας οὐράνιον φῶς. Soph. Ant. 944.

trim. acatal. ἀλλ' ἂ μοιρίδια τις δύνασις δεινὰ. ib. 950.

Pæonic Metre.

A pæonic verse admits any foot of the *same time* as a pæon, viz. a cretic, a bacchius, or a tribrach and pyrrhic jointly; a palimbacchius or third pæon is not often found. The construction of the verse is most perfect when each metre ends with a word.

Dim. brachycat. ὁμόγαμος | κυρεῖ. Phæn. 137.

Dim. catal. χαλκὸς δὲ | τ' ἔμβολα. Phæn. 113.

Dim. acatal. διοιχόμεθ', | οἰχόμεθα. Orest. 179.

Trim. brachycat. οὐ πρόσφορος | ἡμερίων | γέννα. Phæn. 132.

Trim. catal. λαίνοις | Ἀμφίονος | ὀργάνοις. ib. 114.

Trim. hypercat. μεγάλα δὲ | τις δύναμις | δι' ἀλαστόρων. Or. 1502.

Versus asynarteti.

Hec. 1030. δεῖν' αἰ, δεῖν' αἰ || πῆπὸν θ' αἰ μὲν. troch. syz. + iamb. syz.

457. ἐνθά πρῶτ' || γόνος τέ φοῖνιξ. troch. syz. + iamb. penthem.

A verse of this kind, in which a trochaic is followed by an iambic syzygy, or *vice versa*, is termed *periodicus*.

Eur. Or. 1404. αἰλίνον, αἰλίνον || ἄρχαν θ' ἀνὰ τοῦ. dact. dim. + anap. monom.

824. ἢ ματροκτόνον | αἷμα χεῖρ' ὁρᾷ. dact. dim. + troch. ithyphallic.

Hec. 915. ἐπὶ δὲ μινδὸν ὥς || πῆσοιμ' ἔς εὐνᾶν. anap. monom. + iamb. penth.

Or. 960. στράτηλάτων || Ἑλλάδος πότ' ὄντων. iamb. monom. + troch. ithyph.

Phæn. 1033. ἔβας, ἔβας || ὦ πτέρου σά γὰρ λὸ χεῖμα. iamb. monom. + troch. dim.

Hec. 1033. αἰθέρ' ἀμπτὰ || μινδὸς οὐρανὸν. troch. monom. + anap. monom.

Verses, consisting of entirely irregular feet, are termed *polyschemastis*:

Οἰδ' ἰπὸ δ' αἰ | βρότων οὐδ' ἔ | νᾶ μᾶκ' αἰ | τ' ὦ. Soph. Oed. T. 1195.

A *glyconus polyschematistis* contains a choriambus in the second foot:

Ἀλέξανδρος | εἰλάτ' ἰν' αἰ. Hec. 630.

τὶ τοῦς ἀνὼ | θ' ἔν φρονίμῳ

ταῦτοῦς αἰὼ | νοῦς ἐσθ' ὡ

With this compare the ἰωνοί. 635—642.

* Observe, that in the first part of the verse, (as in 10.) a fourth epistrophe answers to a trochaic *dispositio* in the strophe; these are countable: thus in Eur. Hipp. 567. the first line of the strophe τῶν μὲν αἰῶν is answered in the antistrophe by ὦ ὄφρα δὲ ἔρπον.

† This line does not correspond with the strophe; a transposition seems necessary: see note on it.
 ‡ Hence terms this line a *glyconus polyachematus*, having a molossus in the first foot, to which, in the antistrophe, a penthemimer answers.

§ We have here a bacchius answering to an Ionic a maj. in the strophe; the verses may be antimitated rather more by making *ἀπὸ δὲ τῶν ὦν* of four syllables only; in which case the bacchius will answer to an antibacchius.

¶ To reconcile this line with the corresponding one of the strophe, we may read *πᾶσι τῶν ὦν*. Man- grave suggests *ἀπὸ δὲ τῶν ὦν*; but the acc. is necessary.

ON THE

PRONUNCIATION OF THE GREEK LANGUAGE.

THE pronunciation of the Greek and Latin languages (to adopt the remarks of one of our literary journals) is not, as many students in their closets have supposed, a subject of mere curiosity, and worthy only to employ the learned leisure of an antiquary.* On the contrary, every man who has had occasion to travel, and to have intercourse with the learned of any other nation than his own, has felt the want of a common pronunciation of those languages. We, in this country, are indeed apt to consider even the Latin as literally a *dead* language; but no sooner do we reach the continent of Europe, than we find our mistake. We then discover, that it is in very common use, not only as a medium of intercourse between learned strangers of different nations, but also, in the lecture-room, between the professor and the pupil of the same nation. One of the first things, therefore, which we find ourselves obliged to do upon coming into the society of the continental scholars, is to sit down to the humble task of studying, like school-boys, the familiar dialogues of Erasmus and other writers, who furnish us with as pure colloquial Latin as can at this day be attained. But, after we have accomplished this, our *English* mode of pronouncing the language presents a fresh obstacle to our intercourse with the scholars of the old world; and we are continually exposed to the censure which Joseph Scaliger bestowed upon one of our English brethren, who attempted to hold a dialogue with him in Latin. "Even the most learned of the English," says he, "have such a depraved pronunciation of Latin, that once, in this city, when an individual of that nation conversed with me in that language for a full quarter of an hour, and I did not comprehend him any more than if he had been talking Turkish, I begged him to pardon me for not understanding what he said, as I was not acquainted with the *English* language."†

This practice, indeed, our English brethren, as well as ourselves, attempt to justify by the example of the European nations in general, who also pronounce Latin, for the most part, as they do their own languages. But this justification rests upon a fallacy; for the English language, as Bishop Horsley observes, "differs in the powers of the vowels from every other language upon earth;"‡ while the other European languages resemble each other in their principal alphabetic sounds, which are undoubtedly much the same with those of the Latin and Greek. The same rule of pronunciation, therefore, which may be a very good one for the continent of Europe, will be a very fallacious one for the island of Great Britain;—we mean, of course, the *English* part of the island; for the pronunciation of the *Scotch* is so near to that of the continent, that they are easily understood by the continental nations in general; as was the case in the time of their learned sovereign, King James, who observed of their pronunciation—"All the world knows that my master, George Buchanan, was a great master in that faculty [of speaking Latin]; I follow his pronunciation, both of the Latin and Greek, and am sorry that my people of *England* do not the like; for certainly their pronunciation utterly spoils the grace of these two learned languages. But you see all the university and learned men of Scotland express the true and native pronunciation of both."§

It is not our intention, on this occasion, to discuss at large the old question, Whether the present pronunciation of the Greeks is precisely the same with that of their illustrious ancestors, either at their most flourishing period, or for some time afterwards. We have, after an examination made with no small labour, formed a strong opinion that it has undergone very little change for two thousand years. The *written* language itself has been preserved in greater purity, during an equal extent of years, than any of the European languages of the same stock; approaching, in this respect, to the fixed and immovable character of the Oriental tongues, as the nation itself approximates to the people of the East in geographical situation. And we are inclined to believe, with an intelligent modern traveller in Greece, that "the contemporary of William of Malmesbury, or of Froissart, would find more difficulty in conversing with his modern countrymen, than any Athenian of the purer ages with his."§

§ Douglas's Essay on the modern Greeks, &c. p. 91.

Whether the ancient classical pronunciation can be wholly recovered or not, all will agree in the remark of Bishop Horsley, "that it may reasonably be supposed, that the pronunciation of the Greek language, even in the time of Eustathius, who flourished in the beginning of the thirteenth century, much more nearly resembled the pronunciation of the best ages than any thing we can substitute for it now; certainly much more than our barbarous recitation of Greek with the Latin accent, and with the Latin corrupted by our bad way of sounding it."* To the same effect is the opinion of a well known English author, who has, perhaps, bestowed as much attention upon the subject of pronunciation generally, as any writer of our age. "There seems," says Mr. Mitford, "no reasonable ground for doubting, that the present polite pronunciation of Constantinople, and perhaps of Athens, approaches nearer to the speech of the ancient Greeks, than that of any other moderns, with any advantages that study can give"—and that, in order to obtain the nearest possible approximation to the ancient Greek pronunciation, "we can do no other way so well as to adopt the Constantinopolitan."†

The opinions, both of English and continental scholars, have much changed, on this point, since the period of the old controversy between the Erasmians and Reuchlinians; when Sir John Cheke, as professor at the university of Cambridge, in England, with a degree of credulity and illiberality unworthy of a scholar, sturdily asserted, that the pronunciation of the modern Greeks was taught by a confederacy of impostors, who had conspired to obscure their language, in order to render it the more difficult to foreigners, and thus make it the greater source of profit to the native teachers of it;—a confederacy, which would have been as ridiculous as a similar one would be, at the present day, among our teachers of the French, Spanish, or German languages. Within the same English university, however, the liberal spirit of the present age has lately drawn forth the candid acknowledgment, that the English "are almost singular in the erroneous and vitiated pronunciation of some letters of the Greek language."‡ And, in the well known literary journal of the other English university, a late writer has remarked, in strong language—"It is, I believe, an undisputed fact, that our pronunciation of Greek and Latin bears not the slightest resemblance to that of the ancients. . . . I think, also, that the pronunciation used in England, with regard to the Greek language, is not so correct as that of some of the continental nations. If this is admitted, a remedy should be found. I am of opinion that the ancient grammarians will amply supply the remedy. Great attention ought also to be paid to the pronunciation of the modern Greek . . . ; which must obviously approximate more to the standard of the ancients than the method prevalent in England and elsewhere."§

Among the causes, which have more immediately contributed to produce this change of opinion in England, are, the political situation of Greece; the more frequent intercourse, which English travellers, and merchants, and military men, have of late years had with that country; and the establishment of a college at Corfu, under English patronage;—an institution, which, we may remark by the way, though very recently established, has already, as we understand, a library, which is probably larger than any in this country. The two former of these causes have also produced a proportionate effect in the United States. The late revolution in Greece, and the sympathy felt in America for its wretched inhabitants, have been the occasion of our having much more intercourse with the Greek people than we have before had; and we have taken a deeper interest than ever in whatever relates to them. Among other things, their language has attracted more attention than it ever did in this country. The publishers of the press have therefore thought, that, in the estimation of those young persons who are more and who aspire to a liberal course of study, a Greek language at the present day would be an able addition to the student's attainments; for, in addition to the information which native Greeks, who have resorted to our country, can be described on paper; for perfect accuracy.

We have felt the stronger desire that not only to the pronunciation, but to the study of the Greek language, we have a strong belief, that the study of the

service, directly and indirectly, in prosecuting the study of the *ancient*; for so we must, in compliance with usage, denominate it, although, in strict propriety, we can hardly consider it as a different language from the modern, any more than we could say, that Chaucer and his contemporaries wrote in another language than English, because some gradual changes have been made in our language since their time.* A very competent judge in this case, who has passed many years in Greece, and has carefully studied the present language, makes the following just remark upon the advantage of uniting the study of modern Greek with that of the ancient: "A perfect knowledge of it [the modern Greek] cannot be acquired without the previous study of Hellenic; but it would be a very suitable appendage to the customary academical pursuits; and, by leading to a better understanding of the physical and national peculiarities of Greece and its inhabitants, as well as to a variety of analogies in the customs and opinions of the ancients and moderns, it will introduce us to a more correct acquaintance with the most important branch of ancient history, and to a more intimate familiarity with the favourite language of Taste and Science."†

The *alphabet* is pronounced by the Greeks, at the present day, as follows:

ρ	ῥῶ	rho	r	
σ	σῖγμα	see'g'mah	s	
τ	ταῦ	tahf	t;	but when it follows ν, it generally takes the sound of <i>d</i> .
υ	ὑψιλον	eepsilon'	y	short, as in <i>only, holy, &c.</i>
φ	φι	phoe	ph,	or <i>f</i>
χ	χι	khee	kh	guttural, like the German <i>ch</i> , or Scotch <i>gh</i> .
ψ	ψι	psee	ps	
ω	ὦμεγα	o-meg'gah	o	like the <i>o</i> -micron.

The *diphthongs* are pronounced in the following manner:

αι	like	ai	in <i>pain</i> ; or like <i>epsilon</i> .
ει	"	ei	in <i>receive</i> , or long <i>e</i> .
οι	"	oe	in <i>economy</i> , or long <i>e</i> .
υι	"	ui	in <i>guilt</i> ; or, more exactly, like <i>ee</i> .
ου	"	ou	in <i>you</i> , or <i>oo</i> .
αυ	"	af, or av,	according to the nature of the letter which follows it; if it is followed by a <i>sharp</i> consonant, as π, κ, τ, etc., then this diphthong is sounded <i>af</i> ; but if it is followed by a <i>flat</i> consonant, as β, γ, δ, etc., then it is <i>av</i> .
ευ	"	ef, or ev;	as in the case of <i>av</i> .
ηυ	"	eev.	
ωυ	"	ove, or ofe.	

To the preceding may be added a few combinations of consonants.

γγ pronounced like *ng*; thus, ἄγγελος is pronounced *ang'-gyelos*.
 γκ " *ng*; thus, ἑγκέφαλος is pronounced *eng-géphalos*.
 μπ, in middle syllables, like *mb*; as, ἄμβρος, pronounced *am'belos*.
